## Foreword

**Academician Ion Tighineanu,  
President of the Academy of Sciences of Moldova**

The Summer School “*The Path to Scientific Discoveries*” has become, in just a few years, a landmark of academic excellence and intergenerational dialogue in the Republic of Moldova. Initiated with the aim of bringing young people closer to research and opening new horizons toward scientific careers, this educational platform has demonstrated that investing in knowledge is one of the surest paths toward sustainable development and societal progress.

The three editions held so far have brought together school pupils and university students from across the country, offering them the opportunity to interact directly with world-renowned scientists, Nobel Prize laureates, and outstanding personalities from the international academic and professional communities. The comprehensive program, which included lectures, interactive sessions, and visits to research laboratories, has contributed to strengthening the link between education and science, while stimulating curiosity, critical thinking, and young participants' aspirations for knowledge.

Throughout its editions, the Summer School has had the honor of hosting distinguished personalities, including Nobel Prize laureates Hiroshi Amano, Konstantin Novoselov, Richard Roberts, James Rothman, and Rattan Lal, alongside renowned scientists and academic leaders such as Klaus Mainzer, Sierd Cloetingh, Anthony Watts, Ioan-Aurel Pop, Marius Andruh, Nicolae-Victor Zamfir, Marian Enache, Stephanie Boyce, Eva Kondrosi, Kornelius Nielsch, Juras Banys, and many others. The participation of these personalities has given the event an authentic international dimension and has consolidated the status of the Academy of Sciences of Moldova as a promoter of excellence in research and education.

Representatives of the academic community of the Republic of Moldova — members of the Academy of Sciences of Moldova and distinguished researchers — have also contributed with great responsibility and dedication to the organization and successful conduct of the Summer School. Among them are Eva Gudumac, Constantin Gaindric, Stanislav Groppa, Aurelian Gulea, Viorel Prisăcari, and other prominent personalities of the national scientific community. Through their contributions, our scientists have actively supported this initiative and strengthened the academic, interdisciplinary, and formative character of the event.

Through its continuity, international openness, and thematic diversity, the Summer School “*The Path to Scientific Discoveries*” has demonstrated that it can become a true catalyst for scientific vocations. It represents not only an educational project, but also a strategic investment in the country's future, contributing to the formation of a new generation of researchers, innovators, and leaders of knowledge.

The Academy of Sciences of Moldova reaffirms its commitment to supporting and developing this initiative, expanding international cooperation, and creating new opportunities for young people passionate about science. We are firmly convinced that such projects will continue to inspire, connect generations, and shape the European future of the Republic of Moldova.

SUMMER SCHOOL  
the 1<sup>st</sup> edition  
“The Path to Scientific Discoveries”

THE PATH  
TO SCIENTIFIC  
DISCOVERIES

13 – 16 June 2023

**Keynote speakers:**

**Prof. Hiroshi AMANO**, Nobel Prize Laureate in Physics (2014), Nagoya University, Japan

**Prof. Richard ROBERTS**, Nobel Prize Laureate in Medicine (1993), New England Biolabs, USA, **Dr. Iuliana POPESCU**, University of Kentucky, USA,

**Prof. Sierd CLOETINGH**, Distinguished Professor Utrecht University, The Netherlands,

**Prof. Eva KONDOROSI**, Biological Research Centre, Szeged, Hungarian Academy of Sciences, Academia Europaea,

**Prof. Anthony WATTS**, Biochemistry Dept., University of Oxford, UK; President-elect (2021-24), Int. Union Pure & Applied Biophysics,

**Ass. Prof. Viktoriya NEDEVA-ATANASOVA**, PhD, Jr. Expert in Career Center of TC-BAS, Bulgaria, **Prof. Ioan DUMITRACHE**, Romanian Academy and other personalities

17.00	<b>Closing Ceremony. Awarding certificates</b>	

**Friday, June 16, 2023**

10:00 – 14:00 Visit to the research laboratories of the

"Alexandru Ciubotaru" Botanical Garden, USM

**Dr. Maria TABARA** – *"Plant propagation through invitro culture"*

The 1st edition of the Summer School "The Path to Scientific Discoveries" took place between June **13-16, 2023**. The event was organized for pupils and students from all over the country by the Academy of Sciences of Moldova in partnership with the European Academy of Sciences and Arts, the Romanian Academy, the Academy of Legal Sciences of Romania, and the Youth Academy of the Republic of Moldova, with the financial support of the European Commission. The program offered to the participants the opportunity to learn from international experts and engage in practical activities and interactive sessions.

Pupils appreciate the activities carried out in their schools and visits to the research laboratories as contributing to personal development, career guidelines, a deeper understanding of research activities, and the attractiveness and better understanding of the research career.

**SUMMER SCHOOL**  
**the 3<sup>rd</sup> edition**  
**“The Path to Scientific Discoveries”**  
**23 – 27 June 2025**

The organization of the third edition of the Summer School "The Path to Scientific Discoveries," from June 23-27, for the participating pupils and students, both in person and online, was a great opportunity and advantage to broaden their horizons of knowledge and to interact with Nobel Prize laureates, representatives of the scientific diaspora, renowned scholars, and scientific researchers from various fields both in the country and abroad. The students had the opportunity to ask questions, to discuss with scientists. The careful selection of the lecturers, as well as the topics discussed within the Summer School, highlighted the fact that this activity must have continuity, not just be a singular action. The students' responses suggest the idea of examining the possibility of creating a database of gifted students in the country and their subsequent preparation for embracing a scientific career.

Joint academic and educational communities must cooperate to organize such summer schools at the regional level with the involvement of a larger number of students but also teachers, who will subsequently have the task of being ambassadors of science at the regional level.

The organized activities strengthened the connection between research and education in the Republic of Moldova. The Summer School "The Path to Scientific Discoveries," now in its 3rd edition, has repeatedly demonstrated the commitment of the Academy of Sciences of Moldova to promoting excellence in research and education, bringing together brilliant minds from various fields to inspire the next generation of scientists.
